[illegible]

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data collected. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. The fourth step is to develop a solution or answer. This involves applying the analysis to the problem and proposing a course of action or a final answer.

5. The fifth step is to evaluate the solution or answer. This involves checking the solution against the original problem and requirements to ensure it is valid and effective.

Figure 1 illustrates the experimental design. It shows a sequence of events: a stimulus (a word) is presented, a response is recorded (a button press), and the response is evaluated (a feedback signal). The sequence is repeated for multiple trials.

.....

Figure 1. Schematic representation of the experimental design. The first part of the experiment consisted of a 10-min habituation period, followed by a 10-min test period. The second part of the experiment consisted of a 10-min habituation period, followed by a 10-min test period. The third part of the experiment consisted of a 10-min habituation period, followed by a 10-min test period.
